

LEARNING SUPPORT

In the interests of providing learning experiences that are stimulating, relevant and interesting to those children who are in need of extra assistance to reach their full potential, we employ a part time remedial teacher who offers one-to-one as well as group intervention and monitored home programmes. Our aim is to identify these children as early as possible in their school careers, developing a positive self-concept and a realisation of self worth. Additionally we have access to a fully qualified speech therapist and an occupational therapist who give weekly individual therapy sessions at the school during school hours.
